NATIONAL FOREST.

AGRICULTURAL CROP REPORT

1 9 2 8

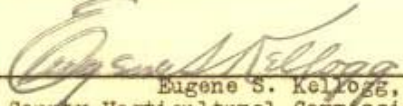

Santa Barbara County, California.

Many requests are received at the County Horticultural Commissioner's office for figures dealing with the agricultural output of Santa Barbara County. These requests come from government agencies, Chambers of Commerce, transportation companies, banking institutions, farmers cooperative organizations, marketing agencies and investigators from various institutions throughout the country. The figures found in this report have been secured from various agencies, including the several large warehouses of the county, the railroads and other common carriers, the various agricultural cooperative marketing associations, the University of California Extension Service, the Federal Agricultural Census, various farmers' organizations, packers, shippers and many individuals in close touch with the movement of agricultural commodities.

It is somewhat difficult to arrive at the production figures on many commodities, such as grain and alfalfa hay since a large tonnage remains on farms, but much of this appears in the form of animal industry products shipped later.

While this is a commodity production report, there is a very strong demand for valuation figures. Those shown here are on the basis of what the farmer received, not f.o.b. values. F.o.b. values for many products representing packing charges added to price to grower, would nearly double that which the grower receives. The figures given represent products sold and in the case of animal industry should not be taken to mean a census of animals in the county.

The acreage of the county has been divided very roughly into three main districts: The Santa Maria, including Guadalupe, Casmalia, Orcutt, Los Alamos and Sisquoc; The Lompoc, including all of the Santa Ynez and Lompoc Valleys and the Coast north of Gaviota; The Santa Barbara, including Carpinteria, Montecito, Goleta and the Coast south of Gaviota. Allocation of production figures to each district in the case of Animal Industry is estimated.

Eugene S. Kellogg,
County Horticultural Commissioner
